

EnduroSolv® Solids = Sustainable Water Treatment

EnduroSolv® solid water treatment products help your facility to be more Sustainable – while addressing your TRIPLE BOTTOM LINE

For the Planet: Environmental Protection

- EnduroSolv® products available with eco-friendly ingredients
- 100% use of product – No triple rinsing of container required
- Product containers are fully recyclable
- EnduroSolv® addresses potential LEED points
- Containers enable plastic reduction, when compared to liquid chemical containers
- Solid form process allows for significant reduction in the use of dangerous caustic chemicals (NaOH)

For Your People: Corporate Social Responsibility

- No dangerous liquid chemicals to spill
- No heavy drums to handle
- No offensive chemical odors
- No liquid chemical exposure issues
- No powders to irritate eyes, nose and mouth

For “Profit”: Enhancing the bottom line

Whether your organization is looking to maximize profits or minimize expenses, EnduroSolv® can help –

- Lower product weight – therefore reduced shipping costs
- No expensive liquid chemical drum disposal issues
- Minimized space limitations in mechanical room
- Reduced energy and water usage
- Improved system performance
